

## Safety First

Here's how we're staying healthy this summer at Camp Shalom's modified day camp program for kids entering 1st-8th grades.

- Easy Drop-off & Pick-up.
  - You stay in the car the entire time (mask on!) and a staffer with personal protective equipment will take your camper's temperature, ask a few health questions, check them in, and make sure they've got everything they need for the day – including their masks, which they'll need for times during the camp day where they'll be in shared spaces (like bathrooms and hallways). We'll assign staggered morning drop-off times starting at 8:00am.
- We'll Go the (Social) Distance!
  - Each group of 12 will have plenty of space in their cabin to keep their belongings (and their bodies) separated. We'll also be coordinating transition times to keep cabin groups away from each other in the hallways and other shared spaces.
- If You Care, You Don't Share!.
  - All supplies will be for individual use. There will be no group sharing of food. Each camper must bring their own lunch and snacks. (Food must be vegetarian/fish/dairy/eggs. No nuts, meat, poultry or shellfish please. We are an allergy-aware camp.) We also ask that each camper brings enough water bottles for the entire day as water fountains will be closed.
- Scrub-a-dub!
  - We'll make sure campers wash and sanitize their hands frequently and we'll help them to avoid touching their faces as much as possible. We'll be cleaning surfaces at least three times per day AND before and after lunch. We'll also do a nightly deep clean of all the surfaces in the cabins.
- Stay Healthy.
  - If a camper does get sick while at camp, we have a designated room where they can wait while we contact you. If their symptoms are related to COVID-19, you'll need to come get them right away in order to ensure the safety of other campers and staff.
  - People with underlying health concerns should consult with their doctor if there are concerns about participating in camp. [As defined by the CDC](#), this includes heart conditions, diabetes, or moderate to severe asthma.

More information will be included in your camp packet after you register for camp.
